To whom it may concern:

Find below recommended procedure for gluing saddle tees for pressure applications.

Gasket Base Saddle Fittings:

Saddles can be equipped with or without a neoprene gasket on the base. For saddles that are equipped with a base gasket, the saddle skirt, stainless steel straps provided can be used to hold it in place once tight. After stainless steel straps have been installed, ratchet straps can be removed.

If you have any other questions, please get in touch.

Sincerely,

Brad Sukolsky
